# Managed Microsoft 365 Security

## Fortify Your Microsoft 365 Environment with Confidence

Our Managed Microsoft 365 Security Services provide end-to-end management and robust security for your M365 environment. Our dedicated team ensures your environment is secure, compliant, and optimized allowing you to focus on your core business with confidence.

## Achieve Unparalleled Security and Compliance

Our Managed Microsoft 365 Security Services offers comprehensive protection and management, ensuring your enterprise remains secure, compliant, and efficient. We take a proactive approach to security, so you can focus on what matters most—growing your business.

We prioritize our services on essential areas such as:

Business email  
compromise  
(BEC) & account  
compromise

Credential theft

Compliance  
violations

Misconfigurations

Our proven methods, grounded in industry best practices and tailored services, allow you to concentrate on core business objectives while we safeguard your digital assets against an ever-evolving threat landscape. With Echelon Risk + Cyber, you're not just choosing a service; you're choosing a partner.

# Outcomes and Benefits of Managed Microsoft 365 Service

Comprehensive Managed Firewall  
Solutions to Protect, Optimize, and  
Streamline Your Network Security

## Strengthened Security and Risk Management

Enhance your Microsoft 365 environment's defenses against unauthorized access, proactively identifying and mitigating vulnerabilities to reduce potential threats, including insider risks. Ensure robust protection of sensitive data and maintain a secure operational landscape.

## Compliance Assurance

Maintain adherence to industry standards and regulatory requirements, minimizing compliance violations and associated penalties.

## Insightful Reporting, Monitoring, and Support

Benefit from continuous monitoring and technical support, ensuring your environment adapts to evolving threats and operational needs.

## Comprehensive Security and Compliance Assessments

Gain valuable insights through comprehensive assessments of Microsoft Defender, Entra ID, Conditional Access Policies, Intune, Exchange, Teams, and more. Detailed reports deliver actionable recommendations to enhance threat protection, identity security, and device compliance, creating a fortified environment tailored to your organization's needs.
